JOHN BEAMS
MODERN LANGUAGES OF
INDIA

In Pali *ri* nearly universally appears as *a*; thus, रा becomes *kata*, हदयं *hadaya*, and a hundred others. The antiquity of Pali, as compared with other species of Prakrit, is additional confirmation of the assertion that *ri* was originally regarded as *ar* or *ra*.

The root वृ॒धि is sometimes treated as *rardh*, at others as *vridh*. In the former case it naturally retains the *a* sound. Thus, वृ॒धि, when regarded as a participle, meaning "increased" or "large," is treated as though it were वर्द्ध, and by rejecting the aspirate forms H. वडा "big," P. वडा, S. वडो, B., O. वड, G. वडी; but when regarded as an adjective in the special sense of "old," we find the *ri* fully recognized as an established fact, and, owing probably to the influence of the labial, it passes into *u*. Thus, H. वुडा and वूडा "an old man," वुडो and वुडिया "an old woman," P. वुडा, वडी, S. वुडो, वुडा, B. वुडा, वुडी, O. वुडा, वुडी, G. वुडो, वुडी.

वृत् is another root which has widespread ramifications. In Prakrit the derivatives of this root generally appear to have exhibited the *u* sound, as *pauitti*, *xiudam*, *samrudam*, *nirrudam*, *vittanto*, for *pravitti*, *ririta*, *samerita*, *nirrita*, *vrillanta* (Var. i. 29); but in the Jain Pr. of the Bhāgavati the Sanskrit forms *vritta*, *pravitta*, are found, and the ordinary form *vart* goes into organs respectively. Vararuchi, as usual, is here vague, and merely strings together a number of instances without any attempt at making a definite rule. His Sūtra iii. 60 is perhaps not open to this objection, as it lays down that when two consonants forming a nexus suffer disjunction, the former of them having no vowel of its own, takes the same vowel as the latter, e.g. *kishta*=*kīttham*, *slishta*=*slīttham*, *ratna*=*rañna* (through *ratana*), *kriyā*=*kiriā*, *sārṅga*=*sārṅga*; but he immediately afterwards (iii. 62) gives a list of words in which this rule is not observed; these latter are rather more numerous than the former. They are *śri*=*siri*, *hṛi*=*hiri*, *kṛita*=*kītta*, *klānta*=*kilanto*, *klesa*=*kilesa*, *mlāna*=*milāna*, *swapna*=*seino*, *sparsa*=*pharisō*, *harsha*=*hariō*, *arha*=*ariō*, *yarka*=*yarcho*.

In the first three of these the rule is so far kept that the inserted vowel, though short, is of the same organ as the following vowel, and the same may be said of *kleso*. In the next Sūtra (63) we have *kshmā*=*khama*, *slidha*=*salaka* (though *sildha* is also found), and in S. 65 *paūma*=*paūna* (*paduma*), *tanvī*, *lāghvī*,= *tanvī*, *lahvī*. The labial *m* perhaps accounts for the *u* in *paūma*, and in the other two words, as also in *jīta* for *jyā* we have merely a solution of the semivowel into its corresponding vowel, and not an insertion at all.

May it not be that the real solution of the question rests in the comparative lightness and heaviness of the vowels themselves? Where the syllables following the divided nexus are not of any great length and weight, the natural tendency to insert a vowel similar to that borne by the nexus when yet undivided can have full play; but when the following syllables are long and heavy, the lightest of all the vowel-sounds is preferred, and thus we get *kilanto*, instead of *kalanto*, from *klānta*; while in *śri*, *hṛi*, the usual, and so to speak congenial, insertion of the *i* is practicable. The question lies entirely between *a* and *i*; *u* is never used in this respect, unless there is some labial influence at work.

B

Vararuchi does not make this rule general in Prakrit, but confines its operation to *t*, *p*, and *t̄*, giving as examples *udu*, *raadam*, *āado*, *nīvudi*, and others, for *ritu*, *rajatam*, *āgata*, *nirriti*, etc. He makes transition from *p* to *v* general, and gives instances: *sāvo*, *savaho*, *ularo*, *uvasaggo*, for *sāpa*, *sapatha*, *ulapa*, *upasarga*. *Upa* is universally changed into *ua*, and even *uā* (see § 53). The change of *t̄* to *d̄* is illustrated by *nado*, *vidaro*, for *nata*, *vitapa*, but there are hundreds of instances to be found in Prakrit works.

§ 53. (3.) Elision is in Prakrit the rule: retention and weakening, to a certain extent, the exceptions. Vararuchi's rule (ii. 2) is very sweeping, and includes all the unaspirated letters of the four organs, except the cerebrals, as stated before (§ 51). अ and ए are added probably because they are so closely connected with आ and ए respectively. The instances given are *maūlo*, *naūlo*, *sārō*, *naaram*, *vaanam*, *sūt*, *gao*, *raadam*, *kaam*, *viānam*, *gad*, *mao*, *kaī*, *viulam*, *vāinib*, *naanam*, *jīam*, for *makula*, *nakula*, *sāgara*, *nagara*, *vachanam*, *sūchi*, *gaja*, *rajatam*, *kṛita*, *vitānu*, *gadda*, *mada*, *kapi*, *vipula*, *vāyund*, *nayana*, *jīva*.

The confusion arising in Prakrit from this constant elision is extraordinary; thus, *vaṇa* stands for *vāchana*, *vadana*, *vapana*; *vaa* for *pada*, *vayas*, and *Vraje*; *rāt̄* for *rājī*, *rātri*; *raa* for *raya*,

CHANGES OF SINGLE CONSONANTS.

201

rajas, *rata*; and the accumulation of vowels with no intervening consonant is in striking contrast to the Sanskrit, which tolerates no hiatus. *Juijana* जूजना = *yuvajana*, *Udraka* उद्रका = *upakraka*, *uāa* = *udaka*, *āirahaa* = *abhirataka*, *aujjuā* = *atyujuka*; so that we seem to be listening to some Maori or other Polynesian dialect. and I cannot bring myself to believe that the people of India at any stage of their history ever spoke such a form of speech as this.

In the modern languages instances of elision are tolerably frequent, but they do not result in hiatus to such an extent as in Prakrit. Either one of the vowels goes out with the consonant or the two vowels which are left behind coalesce into one, or hiatus is avoided, as it is also in some kinds of prose Prakrit, by the insertion of अ, ए, or even ए. For the treatment of vowels in hiatus see §

MAORI

Here the long vowel of the Sanskrit is sometimes shortened, but we cannot build any theory on this fact because so much of Prakrit literature is in verse that changes in quantity are in a majority of instances merely made *metri gratia*. Vararuchi's instances are taken from compound words only, but a large number may be adduced from other sources, where elision has taken place in a simple uncompounded word, and where in consequence the influence of the laws of euphony might be expected to be more apparent. In the following list the order of the vowels is followed throughout.

(1.) *a + a*. Pr. *kađaa, kaamba, gaana, jaalachhi, paa, paavi*, for Skr. *kaṭaka, kadamba, gagana, jayalakshmi, pada, padavi*.

(2.) *a + ā*. Pr. *ākā, padvā, lād, haāsdi*; for Skr. *akāla, prajñāpati, latā, hatāśayā*.

(3.) *a + i*. Pr. *kai, gaī, jai, pařirkka, mairā*; Skr. *kari, gati, yadi, pratirikta, madirā*, and in the 3rd pers. sing. of the present tense *parasmaipada* of all verbs.

(4.) *a + ī*. Pr. *ṇat, pařva, bhaavač, sāt, Parvatī*; Skr. *nadi, pradīpa, bhagavatī, sattī, Pārvatī*.

(5.) *a + u*. Pr. *chaujāmā, paūra, maulā, laū*; Skr. *chaturyāmā, prachura, makula, laghu*; and derivatives of *chatur* = *chau*, universally.

(6.) *a + ā*. Pr. *māha, māra*; Skr. *mayukha, mayūra*.

(7.) *a + e*. Pr. *kae, jae, vachhae, tanuuae*; Skr. *krite* (through *kade*), *jagati, vrajate* (?); *tanukāyale*; and in 3rd pers. sing. present of *ātmanepada* and passive verbs in general.

(8.) *a + o*. Pr. *uao, qao, paosa, puohara*; Skr. *udakah, gajah, pradosha, payodhara*.

(9.) *ā + a*. Pr. *āvara, āvara, kāa, gāai, chhāa*; Skr. *ādara, ātapa, kākā, gāyati, chhāya*, at the end of a compound.

(10.) *ā + ā*. Pr. *ākā, chhād, jād*; Skr. *ākāsa, chhāyā, jāyā*.

(11.) *ā + i*. Pr. *ākijāi, jāi, jampiāi*; Skr. *abhijāti, jāti, jalpitāni*.

(12.) *ā + ī*. Pr. *gāt, rāt*; Skr. *gātī, rājī*.

(13.) *ā + u*. Pr. *āü, āüla*; *āyus, ākula*.

(14.) *ā + e*. Pr. *vāei, lāei, pahiājāde*; Skr. *vādayati, lāgāyati, pathikajāyāyāh*. The forms *āe* and *āi* are extensively employed instead of the Sanskrit forms *ayā*, *āyai*, and *āyāh* of the instrumental, dative, and genitive of feminine nouns in *ā*.

Magadhi of the Jains, as well as the language of the *Saptaśataka*, presents instances of rejection of initial consonants; thus, *a=cha, uno=punar, udham=gādham, aūnā=chafur*, and the like. This process is absolutely unknown in the modern languages, and it may be doubted whether it was ever really in vogue even in Prakrit beyond the limits of literary composition.

The softening of initial tenues into mediae, or, in the case of the labials, into the semivowels, is found to occur in instances where the modern languages retain the letter in its original Sanskrit grade. Thus *vai=pati, vaā=pada, vandu=pāndu, ratta=patra, radā=patkā*. The process appears to have been almost confined to *p*, a letter which, as we shall frequently see in this chapter, is peculiarly weak and liable to change. > | P.B.V. BH-170 > WH-170

A SĀRE SĀRAMATINO SĀRE CĀSĀ RADASSINO
 TE SĀRĀN NĀ-DHIGACCHANTI MICCHĀSAMĀKAPPA-
 GO-CARĀ

Mowa truc' z cicha, jaś z nitym wyziewem.
 Postać miedź skromna, jaś wąż wystygły.
 Je smery a ach, to swierzcze mi w ucho.

Jagi smes! - kameryunką świszącą jaś pużozzyki,
 Darmy ogonem skrzędzą jak grzechotniki

P.M.
